

Abstract

A setting and curing accelerator for hydraulic binders comprises: $\text{Al}_2(\text{SO}_4)_3$ aluminum sulfate, $\text{Al}(\text{OH})_3$ aluminum hydroxide and mineral acid in aqueous solution.

5 The setting and curing accelerator preferably comprises:

- 10-50% of $\text{Al}_2(\text{SO}_4)_3$ aluminum sulfate,

- 5-30% of $\text{Al}(\text{OH})_3$ aluminum hydroxide,

10 - 0.5-10% of a mineral acid

in aqueous solution.
